rush search

Hi Paula,

Could you please authorize the following rush search for an amendment which is due?

Thanks, Jennifer

STIC:

Please search SEQ ID NO: 1 from 09/844,281 in pending and commercial databases.

Thanks, Jennifer Graser REMSEN EO3 B09/ 3C18 mailbox AU 1645 272-0858

Mesnage S., Tosi-Couture E., Mock M., Gounon P., Fouet A.;
Molecular characterization of the Bacillus anthracis main S-layer
component; evidence that it is the major cell-associated antigen.";

Mol. Microbiol. 23:1147-1155(1997).
--- FUNCTION: The S-layer is a paracrystalline mono-layered assembly of proteins which coat the surface of bacteria.
--- SUBCELLUIAR LOCATION: Cell wall.
--- SIMILARITY: Contains 3 S-layer homology (SLH) domains.

                                                                                                                                                                                                                                                                                                        S-layer-encoding gene...;
Gene 173:189-194(1996).
-!- FUNCTION: The S-layer is a paracrystalline mono-layered assembly of proteins which coat the surface of bacteria.
-!- SUBCELLULAR LOCATION: Cell wall.
-!- SIMILARITY: Contains 3 S-layer homology (SLH) domains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Gaps

-!- FUNCTION: The S-layer is a paracrystalline mono-layered assembly
-!- FUNCTION: The S-layer is a paracrystalline mono-layered assembly
-i- puncablina Location: cell wall.
-!- PTM: PROBABLY GLYCOSYLATED.
-!- PTM: SIMILARITY: Contains 3 S-layer homology (SLH) domains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Length

"Cloning and sequencing of the gene encoding a 125-kilodalton
"Cloning and sequencing of the gene encoding a 125-kilodalton
surface-layer protein from Bacillus sphaericus 2362 and of a related
curptic gene.";
J. Bacteriol. 171:4178-4188(1989).
-!- FUNCTION: The S-layer is a paracrystalline mono-layered assembly
of proteins which coat the surface of bacteria.
-!- SUBCELLULAR LOCATION: Cell wall.
-!- SIMILARITY: Contains 3 S-layer homology (SLH) domains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       : :: | : : | | : : : | 424 HGTETFYYKAPTQKSNPYVNDSRILAEKIQ-KRLITALQTRDRGVKIGNLYVLREN

Submitted (NOV-1999) to the EMBL/GenBank/DDBJ databases.
-!- SUBCELLULAR LOCATION: Cell wall (Potential).
-!- SIMILARITY: IN THE C.TERMINAL SECTION, BELONGS TO THE NACHTYLMURAMOYL-L-ALANINE AMIDASE FAMILY 3.
-!- SIMILARITY: Contains 3 S-layer homology (SLH) domains.
                                                                                                                                                                                                                                                                                                                                                                                                     28-FEB-2003 (Rel. 41, Created)
28-FEB-2003 (Rel. 41, Last sequence update)

-1. CATALYTIC ACTIVITY: Endohydrollysis of 1,4-beta-D-glucosidic linkages in cellulose, lichenin and cereal beta-D-glucosis.
-1. SIMILARITY: Belongs to cellulase family A (family 5 of glycosyl hydrolases).
-1. SIMILARITY: Contains 3 S-layer homology (SLH) domains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          311;
